

Professional Summary

Web Developer with 6 months of professional experience working on client websites, web applications and cloud-based projects. Hands-on experience with JavaScript, PHP, SQL, Firebase, Google Cloud, Cloud Functions and Flutter application maintenance, including adding new features, debugging and fixing application issues. Experienced in SEO, AEO, GEO and LEO implementation, along with development, debugging, deployment, migration and backup workflows.

Education

New English jr. college Hsc	vasai Jun 2020 - Apr 2021
Mumbai university B.Sc.IT	vasai Apr 2021 - May 2024

Experience

BitBlue Technology - Jr. Front-End Developer	Feb 2026 - Present
Developed and maintained websites for multiple client projects using modern web technologies. Implemented SEO, AEO, GEO and LEO improvements across multiple client websites. Worked on web, iOS and Android applications, including Flutter debugging and resolving development-related issues. Gained hands-on experience with Firebase, Cloud Functions, Cloud Scheduler and Google Cloud for application and backend requirements. Created and improved scripts for Cloud Function deployment, migration and backup processes. Worked with PHP and SQL for client-related queries, database operations and technical requirements. Worked on application deployment and requirements related to Google Play Store and Apple App Store.	

Projects

F.R.I.D.A.Y. AI Chatbot	Ongoing
<i>Skills: HTML, CSS, JavaScript, Node.js, REST API / SSE Streaming, Supabase, Vercel</i>	
Developed a full-stack, lightweight AI chatbot system (F.R.I.D.A.Y.) with a zero-dependency Node.js backend using native HTTP modules. Implemented real-time Server-Sent Events (SSE) stream proxying with typewriter response rendering and custom Markdown syntax highlighting. Integrated Supabase Authentication (Google OAuth) and database persistence for user chat history, user profiles, and system prompt instructions. Designed a responsive dark-mode glassmorphic frontend UI featuring local state management, Base64 link sharing, and Markdown file exports.	
Personal Portfolio Website	Ongoing
<i>Skills: React.js, Tailwind CSS, Vite, Node.js, Framer Motion, Technical SEO, AEO, LEO, JSON-LD</i>	
Built a high-performance React.js platform using Vite and custom Node.js pre-rendering across 38+ static routes. Achieved 99/100 Lighthouse Performance, with 100/100 Accessibility, Best Practices and SEO scores. Implemented advanced SEO, AEO and LEO architecture using structured JSON-LD schemas. Developed canonical URL handling, Netlify redirects and an IndexNow API workflow for search-engine indexing. Built a responsive UI with Tailwind CSS, custom SVG graphics, Framer Motion animations and a static blogging system.	
Sampark 2.0 — Sabha Management PWA	Ongoing
<i>Skills: Next.js 16, React 19, TypeScript, Tailwind CSS, Supabase, PostgreSQL, PWA, Web Push API, Cloudinary, Recharts, jsPDF, Vercel</i>	
Built a full-featured Progressive Web App (PWA) for member management, attendance tracking, zone-based administration and reporting. Implemented role-based authentication and access control using Supabase Auth, Email OTP verification and Row Level Security (RLS). Developed an offline-first architecture using Service Workers and IndexedDB, allowing actions to be stored offline and synchronized when connectivity is restored. Implemented real-time attendance synchronization using Supabase Realtime/WebSockets, along with analytics, zone-wise reports and PDF export using Recharts and jsPDF. Designed a centralized application data architecture using Next.js API Routes and Zustand, with integrations for Cloudinary image uploads, Web Push notifications and Netlify deployment.	

Skills

HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap, jQuery, Responsive Web Development, Node.js, Express.js, PHP, SQL, MySQL, REST APIs, JWT Authentication, Google Cloud Platform (GCP), Cloud Functions, Cloud Scheduler, Firebase, Cloud Deployment, Migration & Backup, Deployment Automation, Flutter, Android/iOS Application Development, Git, GitHub, VS Code, Postman, SEO, AEO, GEO, LEO, Technical SEO, JSON-LD, Core Web Vitals, PWA, IndexedDB, Service Workers, Web Push API

Technical Areas

- REST API Development
- Authentication & Authorization

- JWT Authentication
- SQL & Database Operations
- API Debugging & Troubleshooting
- Firebase & Cloud Functions
- Cloud Scheduler & Automated Workflows
- PWA & Offline-First Development
- Deployment & Migration
- Server & Application Troubleshooting

Cloud & Infrastructure

- Google Cloud Platform (GCP)
- Firebase
- Cloud Functions
- Cloud Scheduler
- Cloud Deployment
- Migration & Backup
- Server Management & Troubleshooting
- Realtime Database

Web & Search Optimization

- Technical SEO
- AEO (Answer Engine Optimization)
- GEO (Generative Engine Optimization)
- LEO (Location Engine Optimization)
- JSON-LD Structured Data
- Core Web Vitals
- Website Performance Optimization

Mobile & PWA

- Progressive Web Apps (PWA)
- Offline-First Architecture
- IndexedDB
- Service Workers
- Web Push Notifications
- Flutter Debugging
- Android/iOS Application Support
